

Public Agenda Bar Plot Activity

1. Create a bar plot for effort.
 - Copy the plot to a document.
 - How does the effort of the students that responded compare?
2. Create a bar plot for homework.
 - Copy the plot to a document.
 - How much homework did most students respond to that they have?
 - How do you think that compares with students at your school?]
 - If you think responses about homework are different from those at your school, why do you think students in this survey might have responded as they did? How could you test your assumption?
3. Create a bar plot for grades.
 - Copy the plot to a document.
 - What grade is most common?
 - How do you think that compares with students at your school?
 - If you think grades are different from those at your school, why do you think students in this survey might have responded as they did? How could you test your assumption?
